

**CHAPTER 6
STREET NUMBERING**

SECTION:

- 10-6-1: Supervision of Street Numbering
- 10-6-2: Baseline Numbering Systems
- 10-6-3: Method of Numbering
- 10-6-4: Address Identification

10-6-1: **SUPERVISION OF STREET NUMBERING:** The Community Development Services Department shall supervise the numbering of all houses and buildings upon the streets and avenues within the City. (Ord. 3003, 4-23-15)

10-6-2: **BASELINE NUMBERING SYSTEMS:**

(A) **Baseline Systems.** All residences and businesses within the City shall be numbered in accordance with the street numbering system set forth in this Chapter. All buildings within the City shall be numbered in accordance with two separate baseline systems, each of which shall have a north-south baseline and an east-west baseline. The intersection of each of such baselines shall hereafter be referred to as the initial points.

(B) **Original Townsite Baseline.** The initial point for the following described baseline system shall be the junction of the center line of South Eastern Avenue and the center line of Walnut Street extended west. The north-south baseline shall run along the center line of Eastern Avenue, and the east-west baseline shall run along the center line of Walnut Street extended west to Interstate 15. All residences and businesses located within the following described area shall be numbered in accordance with such baselines, to-wit: Commencing at the junction of South Eastern Avenue and West 13th Street extended; thence easterly to South Boulevard; thence northerly along South Boulevard to West Elva Street; thence west to Riverside Drive; thence northwesterly along the east bank of the Snake River to Highway 20; thence southwesterly along Highway 20 to I-15; thence southerly along I-15 to Pancheri Drive; thence easterly along Pancheri Drive to South Yellowstone Avenue; thence northeasterly on South Yellowstone Avenue to the junction of South Yellowstone and Short Street; thence easterly to the point of beginning. Such area shall hereafter be referred to as the Original Townsite.

(C) **Areas Other Than Original Townsite.** The numbering of all houses and businesses located within all portions of the City other than the Original Townsite, shall conform to the following described baseline system. The initial point for this area of the City shall be the junction of the center lines of First Street extended and North Boulevard. The north-south baseline shall run along the center line of Boulevard, and the east-west baseline shall run along the center line of First Street on the east and along the center line of a line commencing at the initial point and thence southwesterly to the intersection of West Broadway and I-15, and thence westerly along the center line of West Broadway to the City limits.

10-6-3: **METHOD OF NUMBERING:**

(A) Numbering of Streets Generally. Numbering shall commence at the initial point for each baseline system. All blocks shall be numbered with fifty (50) numbers to a side between two intersecting streets, except where such numbering would produce irregularity. Numbering shall extend all directions from the initial points described above with the even numbers being on the right, and the odd numbers on the left, when facing away from the initial point. Houses and buildings located on streets not extending to a baseline shall be numbered as though such street extended to a baseline. All numbers for buildings and houses located on a street shall be approximately evenly proportioned for the 50 numbers located between the two streets intersecting perpendicularly thereto. All building numbers shall conform as nearly as possible to the corresponding points on parallel or nearly parallel streets.

(B) Dual Direction Streets. If a street changes from running approximately parallel to one baseline to another perpendicular baseline, then the numbering shall change at the center of the curve in the street where such change is made, except as set forth below. If a street changes direction and then reverts to running parallel with its original direction without intersection with another street, then all houses and buildings located thereon shall be numbered as though the entire street ran in the same direction for the entire length thereof. In such case, all houses and buildings located thereon shall be numbered in even proportions for the 50 numbers on each side thereof.

(C) Dual Occupancies. Buildings having more than one occupancy shall have separate numbers at the street entrance to each occupancy.

10-6-4: ADDRESS IDENTIFICATION

New and existing buildings shall have approved address numbers, building numbers or approved building identification placed in a position that is plainly legible and visible from the street or road fronting the property. These numbers shall contrast with their background. Address numbers shall be Arabic numbers or alphabetical letters. Numbers shall be a minimum of four inches (4") high with a minimum stroke width of one-half inch (0.5"). Where access is by means of a private road and the building cannot be viewed from the public way, a monument, pole or other sign or means shall be used to identify the structure.
