2012/2015 IECC

Three one-hour sessions in the morning will provide you with the with resources and code references to assist with the design, construction, installations and inspections of specific components of residential homes.

The three-hour afternoon session will provide an overview of the Commercial provisions of the 2015 IECC. We will highlight resources and code references to assist with the design, construction, installation, and inspections on specific components for commercial buildings.

2012 IECC Effective Air Sealing - 1 Hour #13617

This interactive workshop addresses one of the most misunderstood elements of the residential energy code. The course gives you a short history of air sealing in the codes and unravels some of the mystery of why one of the most important parts of building an energy efficient home is often overlooked. Based on years of field work and multiple Treasure Valley homes as case study, you will get an overview of materials, costs and best practices for building a business case on why air sealing deserves more focus.

2012 IRC Attic Ventilation - 1 Hour #11622

This interactive workshop addresses code requirements, product selection and best practices for proper installation of attic ventilation.

2012 IRC Conditioned Crawlspace - 1 Hour #6424

This presentation reviews the differences between conditioned and unconditioned crawlspaces from a code perspective. The interactive session will also discuss benefits, which environments are conducive and best practices for installation

1-hour lunch Break/ Afternoon session begins at 1PM

2015 IECC Commercial Code – 3 Hours #19198

David Freelove (Idaho Energy Code Circuit Rider) will provide an update of the 2015 IECC Commercial Code that went into effect January 1, 2018.

**2015 ICC “preferred provider” and AIA CE
credits available for each class**
